

Toronto Dumpster Bin Size Cheat Sheet 2026

Match your project to the right bin in 60 seconds

Quick reference

- 1 Bathroom rip-out or single garage cleanout**
4 to 10 yard bin. Light, low-volume jobs.
- 2 Single-layer roof under 1,500 sq ft**
10 yard bin. Asphalt shingle weight is the limit, not space.
- 3 Two-layer roof or larger roof**
14 to 20 yard bin. Add room for underlayment and offcuts.
- 4 Basement gut renovation**
14 yard bin. Frame lumber eats more volume than drywall.
- 5 Full kitchen reno with cabinets**
20 yard bin. Cabinets stack badly and waste space.
- 6 Whole-house renovation**
20 to 30 yard bin or two passes of a 14.
- 7 Garage or estate cleanout**
14 to 20 yard. Bulky but light.
- 8 Concrete, brick, or dirt removal**
10 yard heavy-materials bin. Weight cap matters more than volume.
- 9 Mixed landscaping debris**
10 to 14 yard bin depending on woody material.
